Company overview

FourSight Technologies Inc. is a Toronto-based, Canadian-owned managed IT and cybersecurity company. We keep organizations secure, productive and supported, with remote service across Canada and on-site service in the Greater Toronto Area. Our work is delivered as clearly defined products with fixed, published pricing and documented service levels, so buyers know exactly what they get.

Core competencies

IT support and managed services

- Technical support and help desk, with a ticketed client portal that tracks every request
- Local and wide area network (LAN/WAN) maintenance and support
- Microsoft 365 and licensed systems administration, maintenance and support
- Laptop and desktop setup, repair and lifecycle management

Cybersecurity

- Computer, network and internet security, including security baselines and hardening
- Cloud firewall and cloud backup services
- Identity and access protection: two-factor authentication and least-privilege access
- Email authentication (SPF, DKIM, DMARC) to prevent spoofing and invoice fraud

Web, domains and procurement

- Website design, hosting and domain/DNS management
- Supply of desktop and notebook computers and office productivity software

What sets us apart

- **We run what we recommend.** Our own systems use two-factor authentication, DMARC-enforced email and a web application firewall.
- **Clear commitments.** Fixed, published pricing and a published workplace and service-level policy (foursight.ca/workplace-policy).
- **Privacy-conscious delivery.** Personal information is handled in line with PIPEDA, with a named privacy contact.
- **One accountable team.** A single point of contact from first call to resolution.
